

CIRMA E-Learning Center

Work Zone Traffic Control 101 Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

Course Description:

An essential part of work involving traffic is to control all road users through a temporary traffic control (TTC). This is used in highway construction, utility work, maintenance operations, and the management of traffic incidents. It is required to plan for the needs of all road users including motorists, bicyclists, and pedestrians while construction or other work on the road is occurring.

This one-hour course will educate workers who interact with traffic regularly on developing a safe work zone that complies with federal regulations.

Time: One hour [Preview the Work Zone Traffic Control 101 online training program here.](#)

Learning Objectives:

At the end of training, you will better understand:

- Uniform Traffic Control Devices
- Principles of Temporary Traffic Control
- Temporary Traffic Control Elements
