

CIRMA E-Learning Center

Forklift Safety Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

Course Description

This course explains basic forklift training procedures, which may vary considerably depending on the company or organization for which you work. Complete forklift training involves formal instruction (classroom, test taking), as well as practical training (hands on training) focusing on the type of forklift you will be using.

Forklifts are specialized multi-use vehicles that many people simply take for granted. Imagine what it would be like, however, to handle the heavy lifting, moving, stacking, loading and unloading of materials of various sizes, shapes, and weights without them. They can, however, be dangerous if they're operated by people who are not trained to use this highly technical equipment. To drive a forklift safely, you need to understand the possible risks. In this course, the learner will get an introduction to risks inherent with operating a forklift as well as gain understanding regarding the dos and don'ts of operating a forklift safely.

Time: Approximately 30 minutes [Preview the Forklift Safety online training program here.](#)

Learning Objectives:

- Recognize the link between forklift training and equipment safety
- Identify the risks involved with driving a forklift
- Understand the rules for safely driving a forklift

Key Topics Include:

- Basic Training
- Forklift Safety
- OSHA Regulations
- No Operators Under 18 Years of Age
- Identifying Hazards
- Protection
- Safety Procedures
- Loading and Unloading a Forklift
- Forklift Fuel and Batteries
- Inspection
