

# CIRMA E-Learning Center

## Power Tool Safety Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

### Course Description

Power tools are designed to make work easier, but with great power comes great responsibility. Persons using power tools need to familiarize themselves with the safety features and guidelines for any tool they will be using. Not doing so can have devastating results. In 2001, for example, over 418,000 power tool related injuries were treated in hospital emergency rooms. Understanding the rules and guidelines on how to operate these tools safely can significantly minimize the risks. In this course, the learner will have the opportunity to gain greater understanding of the different categories of power tools.

**Time:** Approximately 30 minutes [Preview the Power Tool Safety online training program here.](#)

### Learning Objectives:

- Identify the different categories of power tools
- Recognize the importance of keeping your hands clear of the work surface when operating power tools
- Understand the risk inherent with improper use of power tools

### Key Topics Include:

- Power to Hurt
- Defining Terms
- General Safety Issues
- Good Working Condition
- Mind the Cord
- Tools Unplugged
- Keeping Others Out of the Work Area
- Keeping Your Hands Free
- Saw Safety
- Puncture Wounds
- Pneumatic Tools
- Powder-Actuated Tools
