Disabling Pop-Up Blocker

The user needs to enter the location/member name in the criteria field on the greetings tab, then click find. If there is no pop-up with selections, you probably need to disable your pop-up blocker.

1) Click on Tools in the Menu Bar.
2) Click on Internet Options.
3) Click the Privacy tab
4) Click on Settings next to Pop-Up Blocker
5) Enter www.netclaim.net
6) Click Add
7) Click Close
8) Click OK
Your locations should appear in a pop-up for you to select.
