

CIRMA E-Learning Center

Trench Safety Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

Course Description

Some type of excavation will typically be involved in almost every construction project. Unfortunately, by its very nature, this can be an extremely hazardous activity. Trenches used to install or repair gas, sewer, water and utility lines are particularly dangerous.

In this course, the learner will discover how to recognize the hazards that exist with trenching activities, gain understanding regarding the regulations that govern activities tied to trenching and finally, learn to identify safety procedures associated with trenching activities.

Time: Approximately 30 minutes [Preview the Trench Safety online training program here.](#)

Learning Objectives:

- Recognize the hazards that exist with trenching activities.
- Understand the regulations that govern activities tied to trenching.
- Identify safety procedures associated with trenching activities.

Key Topics Include:

- The Importance of Trench Safety
- Preventing Accidents
- Examining the Hazards
- Protect Yourself
- Before Working in a Trench
- Using Air Monitors
- If a Trench Caves In
