

CIRMA E-Learning Center

Preventing Slips, Trips & Falls - Local Government Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

Course Description

For as long as comedy has existed, one sure way to get a laugh has been to have a character slip and fall. In the workplace, however, there is nothing funny about slips, trips and falls.

Slip, trip and fall accidents are among the leading causes of traumatic occupational death. According to the Bureau of Labor Statistics, approximately 3,000 nonfatal and almost 700 fatal work-related falls occur annually. Since occupational falls are associated with high rates of lost time from work and medical costs, it is in everyone's best interests to understand the risks involved and learn ways to avoid this type of hazard.

In this course, the learner will gain understanding regarding where slips, trips and falls are most likely to occur, how to minimize the risk of workplace accidents and the importance of personal responsibility in risk management.

Time: Approximately 25 minutes [Preview the Preventing Slips, Trips and Falls - Local Government online training program here.](#)
