

CIRMA E-Learning Center

Work Zone Traffic Control 102 Online Training Program

Our E-Learning Programs are **FREE** to all CIRMA members.

Course Description:

An essential part of work involving traffic is being able to control all road users through a temporary traffic control (TTC).

TTC is used in highway construction, utility work, maintenance operations, and managing traffic incidents. TTC is necessary to plan for the needs of all road users including motorists, bicyclists, and pedestrians while construction or other work on the road is occurring.

This Work Zone Traffic Control 102 one-hour course will continue to educate workers (who regularly interact with traffic) on how to develop a safe work zone that complies with federal regulations.

Time: One hour [Preview the Work Zone Traffic Control 102 online training program here.](#)

Learning Objectives:

At the end of training, you will better understand:

- Traffic Control Devices
- Flagger Control
- Controlling Traffic Through Incident Management Areas
